DETAILED ACTION

Claim Objections

1. Claims 4, 6, and 19 are objected to because of the following informalities: there is a period at the end of line 8. In claim 6, the phrase "the plurality of support segments" lacks positive antecedent basis. In claim 19, the phrase "the plurality of platform segments" lacks positive antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7, 9-13, 16-19, 30, and 35-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Hulbert et al (US # 6,337,446). Hulbert discloses the claimed invention including, in the first embodiment, a first support member (18), a second support member (19), a load sensing apparatus (20), an output device (27), and a plurality of platform segments (11-17). See Figures 5-7.

The ninth embodiment shown in figures 27-29 also have a first support member (57,60), a second support member (58,59), a load sensing apparatus

(64), an output device (61), and a plurality of platform segments (62) and a pair of collapsible support beams (63).

Conclusion

4. Claims 8, 14, 15, and 31-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-29 are allowable over the art of record.
